AgentShield — Gantt

Workstream / Objective	Oct 5–11	Oct 12–18	Oct 19–25	Oct 26–Nov 1	Nov 2–8	Nov 9–15	Objective / Outcome Reached
0 · Thinking & Planning							**M0 Architecture locked — Architecture, scope and implementation strategy locked**
Threat model & scope	THINK + PLAN						Trust boundaries, assumptions, non-goals, MVP scope
Architecture & interfaces	THINK + PLAN						Core → policy → ledger → gateway → SDK → console → evaluation
1 · Foundations							**M1 Security kernel ready — Security kernel operational**
Core lattice & provenance		CORE I	CORE II				Labels, join/meet, provenance DAG, tainted values, property tests
Capabilities & trifecta		CORE I	CORE II				Attenuation, delegation, TTL/epoch and lethal-trifecta invariant
2 · Enforcement							**M2 End-to-end enforcement — End-to-end deterministic enforcement**
Cedar policy engine			POLICY	POLICY			Typed MCP schema, cached PDP, default-deny and fail-closed
Ledger & schema pinning				LEDGER	LEDGER		Hash chain, Merkle proofs, signed checkpoints, rug-pull detection
MCP gateway				GATEWAY	GATEWAY		**M3 Human control operational — tools/list + tools/call interception and full decision pipeline**
3 · Human Control							Human approval and emergency revocation operational
Approval receipts					APPROVALS	APPROVALS	Ed25519 receipt, arg digest, nonce, expiry and reviewer tiers
Emergency revocation					REVOCATION	REVOCATION	**M4 Defense stack integrated — Epoch invalidation, kill switch, pending cancellation, blast radius**
4 · Depth							Defense stack integrated
Dual-LLM quarantine					QUARANTINE	QUARANTINE	Symbolic var_ handles; raw untrusted content never reaches planner
Monotonic confinement						CONFINEMENT	Subsumption checks; privilege expansions require human approval
Observability & shadow mode						OBSERVABILITY	**M5 Final security demonstration — OpenTelemetry, decision traces and log-only enforcement**
5 · Surface & Proof							Final security demonstration
Control-plane console						CONSOLE	Policy editor, approval feed, audit explorer, replay and kill switch
Evaluation & adaptive attacks						EVALUATION	AgentDojo, AgentDyn, adaptive attacks and pillar ablations
